Robe launches ClubSpot 250CT & ClubWash 250CT

Robe Show Lighting's new ClubWash and ClubSpot 250 CT range of fixtures is now in full production, following its launch at PLASA and LDI 2004.

Robe Show Lighting's new ClubWash and ClubSpot 250 CT range of fixtures is now in full production, following its launch at PLASA and LDI 2004.

The new Robe Club range has been specifically designed for club and discotheque applications and builds on the huge popularity of Robe's XT Series in this market.

The Club Series combines the latest technology with plenty of creative scope and Robe's unparalleled reputation for "*affordability without compromise*".

It's also been developed after listening to feedback from VJs, lighting designers/operators and owners and operators active in this demanding, fast moving environment - which has enabled Robe to deliver the products they really want.

Both Wash and Spot fixtures are feature-packed, built to Robe's exacting engineering standards and keenly priced.

ClubSpot 250 CT

The ClubSpot 250 CT offers a gobo wheel with 10 static gobos including two replaceable slots + open, continuous rotation and gobo shake; a color wheel with 11 colors + white, rainbow effect in both directions; manual focus, combined dimmers/shutter and strobe effect. The ClubSpot is great value-for-money and ideal for small to medium sized venues and bars or restaurants also incorporating a dancefloor.

ClubWash 250 CT

Features include a manual zoom; color wheel with 11 colors + white; rainbow effect; smooth dimmer & separate shutter + strobe effect. The ClubWash 250 CT is very easy to control and quick to programme. It's highly competitively priced and with its outstanding features-for-value ratio, Club Wash is perfect for small to medium applications and for mobile D/VJs. Both fixtures are easy to control and quick to programme. They include master or slave operation options, plus a stand alone mode, and all the versatility needed for a wide variety of installations.
