

Cyber Mini™

Second generation of the Cyber Control software contains many new and improved features and functions, including support for both 32/64-bit computer versions, new Easy Stand Alone PRO software and newly designed hardware interfaces with more XLR connectors, SD Card data storage, real time clock and others.

The Cyber Mini is the perfect product for small applications with less than 60 DMX channels. It offers a standalone memory with a maximum of 40 steps (60 channels) as well as 6 (4 + next/previous) ports for dry contacts triggering.

Technical Specification

Main features
