

Robe Technical Support Training - Levels

Level One - Robe Basic

Regular maintenance and basic service of Robe fixtures

One day

One day seminar focusing mostly at moving heads of the Robin Series, but covers other series as well where needed. Service and User manuals, Technical Bulletins, Spare parts ordering, Basic functions and parts of a fixture, Trouble shooting methodology, Regular maintenance and cleaning. The seminar also includes factory tour and discussion on common or requested questions and problems.

Get to know how the fixtures work, what parts they contain, how to maintain them and how to do basic service procedures.

Requirements: Lighting equipment basic usage, familiarity with repairs of intelligent lighting.

Level Two - Robe Advanced

Advanced maintenance and troubleshooting for repairs of Robe Fixtures

Three days

Full training for a qualified technician. Functions and parts of a fixture, Service Manuals and their practical usage, Advanced trouble shooting and detection techniques, measurement and repairs.

Advanced maintenance, servicing and troubleshooting techniques. Get a full understanding of what can be done if anything is not working.

Please note that we are flexible to modify the program to meet your needs, let us know what topic we need to include (be as specific as possible). All trainings are in English.
